

Art. 532

Channel Support Bracket (Electro-Galvanised)

Application/Advantages

- Connecting element with **pre-assembled clamping bolts** for producing **light constructions** in connection with C-channels.
- Simple installation by inserting mounting channel into the channel support bracket.
- Labour cost saving installation due to pre-assembled clamping screws.
- Oblong holes in the base plate allow simple alignment of the flange.

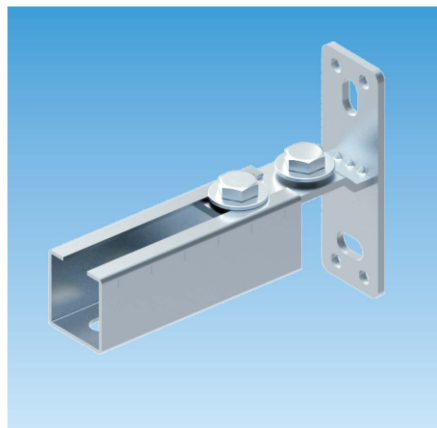

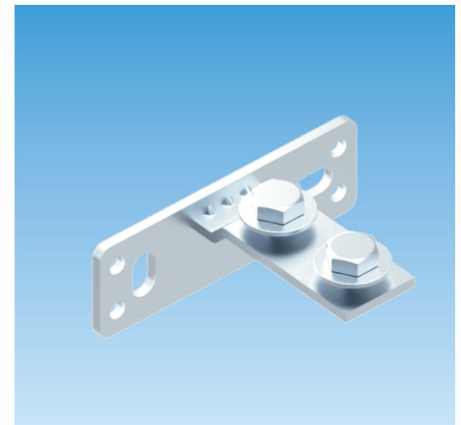

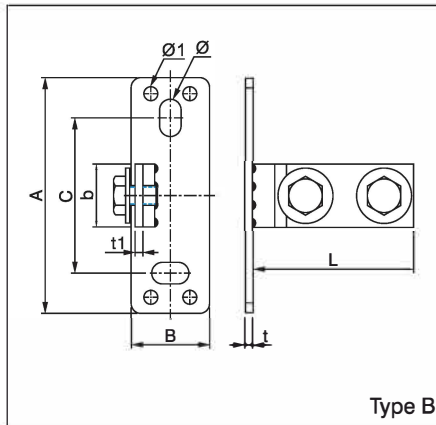

Technical Data

- **Material:** Steel 1.0332 acc. to DIN EN 10111
- **Zinc plating:** Electro zinc plated, 8–12 µm

Installation

- Insert and screw the mounting rail in the saddle flange.
- Good fixing possibility using suitable anchor.
- Good height adjustment using slots in the base plate.

Article Number	Type	For Channel	Dimensions [mm]								Pack Size [pcs]
			A	B	C	b	L	t	Ø	Ø1
